## **An abstract of a search entitled**

### **responsibility of achieving economy development from view of Islamic canon**

The topic of this thesis has tackled the economic development as it's a group of activities aiming to achieve comfort and opulence that qualify it to stand by with the right of the granting in the land .

It is aiming to display the great value of the responsibility, its causes and its significance in achieving economy development as well as what comes as a result of it such as reward and punishment .The thesis also points to the concept , legitimate description, fields, the bases which rises it up, and who is in charge of achieving development in the actual life of people.

Depending on the descriptive and inductive curriculum which depends on describing the different phenomena and trying to understand and interpret them to reach to the relationship which adjust the changings and forming them in form of disciplines and rules for the legal texts .

All what mentioned above have been researched in three chapters as follows:

#### **Chapter I:**

Talks about the responsibility in three fields of research:

**The first field of research:** The responsibility ; the concept and importance

**The second field of research:** describing responsibility and its sorts

**The third field of research:** Causes of the responsibility

## Chapter II

Talks about responsibility in three searches :

**The first field of research:** the concept of development

**The second field of research:** The legitimate description

**The third field of research:** Bases of development

## Chapter III

partakes of responsibility of achieving economic development from view of Islamic canon in three fields of research:

**The first field of research:** responsibility of governments in achieving economic development .

**The second field of research:** responsibility of societal organizations in achieving economic development .

**The third field of research:** responsibility of individuals in achieving economic development.

All these for the sake of forming a thought participates in treating snags of the fault in the constructions of intellectual creating and society that disavowed the action responsibility or action corruption, also participates in enhancing the soul of feeling responsibility and waking up its causes in the human self to jump forward to meet generous life and civilizational development, therefore all people become happy under its shade with a good life.

**Many results have produced as a result of this research. The most of them are as follows :**

- The responsibility : which means that man is responsible for the actions ,therefore he is responsible for their outcomes .

- The development is an organized process that struggles to move to a desirable condition that can achieve the community comfort and man promotion by what can be reached of aims of man existence in both levels – worship and maintenance.

**The research has been enhanced by a group of recommendations some of them are :**

- Taking care of planting the soul of responsibility in the young's hearts since the early stages of education starting with the family passing by the other different stages of education.
- Writing a scientific study that represents signposts for civil community organizations in its social interference , such as the civil society organizations and their roles in community development economically .
